TruGreen® - r-PET Smoothie Cups & Lids

Our range of high quality r-PET cold cups are produced from independently certified post-consumer material and are widely recyclable, making them a better environmental option for business and consumers.

The material is both strong and crystal clear which is ideal for serving a wide range of beverages including smoothies, juices, bubble tea and iced coffee.

A major benefit is the one size fits all lid and the fully rolled rim that gives extra strength and a secure seal.

CUSTOM PRINT IS AVAILABLE

TruGreen® - r-PET CE marked Cold Cups

Catering outlets serving beers, ciders and larger can now take advantage of our r-PET cold cups which are available with CE marking, thereby meeting the legal standards for use in licensed outlets where compliance and sustainability go hand in hand.

The material has a high level of clarity and strength which also adds a premium touch to the drinks served while maintaining a safe environment.
